

Corruption [Mr.C]

dtilla make this walkthrough-

All potions are available at sanctuary (3 types : normal, male and gas)

The corruption level is indicated by the outfits of the characters.
The more slutty outfit they wear the more corrupted they are.
Events and actions are tied to the corruption level, if you want to see all events/actions don't give potions too fast
Also some special events need several characters to be at a defined level of corruption. It would be wise to corrupt all characters at the same level before going further.

Warning : once enslaved the non-enslaved actions can't be seen again (ex. : make your mother and daughter work in maid outfits in cafe).
Warning : if you enslaved your mother and sister before being in good terms with your neighbour's husband you will block your future path.
Warning : if you have corrupted characters too much (by cheat or before an update of their content is released you will be blocked because their corruption level is too high and won't trigger the new content. You need to begin a new game, use a previous saved game or change their corruption level in console.

Items : you should quickly buy the items in the sex shop, they are required to let some characters perform specific actions (rope play, ...)

Money : if you play without cheat I advise you :

- Always go to work on morning on week days
- Work on your computer until evening (100 \$ for unit of time)
- Buy normal potions at beginning, others are useless for now
- First corrupt your boss (+100\$ by level of corruption) and it doesn't take a unit of time since you are at work
- Second take the school job (Tuesday and Thursday), you can work on cafe in morning then go to school job on these days. You will be transferred directly in your room.

Only 4 women can be enslaved for now :
